ACME GROWTH LABS

The 2026 Outbound Pipeline Playbook

How high-growth B2B teams turn cold outreach into booked meetings, without sounding like everyone else.

Prepared for [Company Name]
Attn: {{first_name}} {{last_name}}

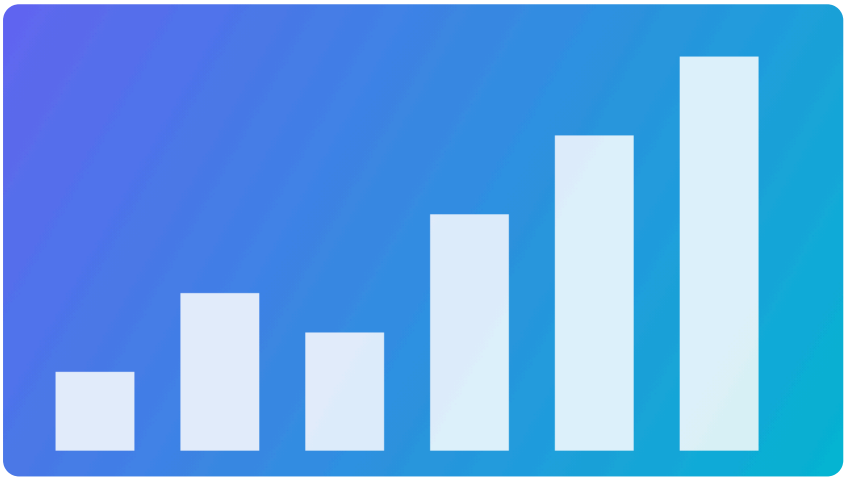

Why personalisation wins

Generic outreach is ignored. Buyers receive dozens of near-identical emails a week, so relevance is the only filter that still works. Teams that reference the buyer's company, role and context see dramatically higher reply rates.

3.4x
more replies than generic sequences

47%
shorter sales cycles

$1.2M
pipeline created per rep

What the best teams do

- Lead with a specific insight about the prospect's business
- Match the message to the buyer's seniority and department
- Give prospects a page that speaks to them, not a brochure
- Follow up based on what they actually looked at

> *“We stopped sending PDFs and started sending pages that felt written for each buyer. Meetings doubled in a quarter.”*
> *— Jordan Lee, VP Sales, Northwind*

How it works

1. Capture. Pull accounts and contacts into your enrichment tool.

2. Personalise. Merge name, company and job title into every asset.

3. Send. Drop a unique link into your sequence.

4. Follow up. Trigger the next step when they engage.
